.70 https://old.reddit.com/r/UFOscience/comments/1f417m8/a_technical_explanation_of_how_a_flying_saucer/ information, ufo propulsion, magnetic excitation field is made by a pair of Helmholtz coils above and below the disk. However, "flying saucers" are an altered form of a Hall effect disk generator. Instead, these flying saucers induce an electromagnetic field around the entirety of the craft. This has the same effect as the magnetic excitation provided by the Helmholtz coils and it provides a side benefit: propulsion. There is no engine and there appears to be no fuel source because the flying saucers use electrons drawn from oxygen and nitrogen molecules.
